Multisig Transaction Confirmation Report

Multisig Safe Configuration

Safe Address	0xA2952C5F625e59E21012FB92A8D8269Fdb324554
Network	Ethereum Mainnet
Configuration	4 out of 7 signers required

First Multisig Transaction

Transaction Hash	0x3dc91e19fc3489a26a35fd986754cdb651ffbbc42cdb2c9956eef6d0758e8f4
Status	■ Success (Confirmed)
Block	23480326
Timestamp	Oct-01-2025 03:38:11 AM UTC
From	Coinbase Deposit
To	0xA2952C5F625e59E21012FB92A8D8269Fdb324554 (Safe)

Key Benefits of the Multisig Setup

- Security: Requires multiple team approvals (4/7) to execute transactions.
- Transparency: All actions are visible on-chain via Etherscan.
- Governance: Decentralized decision-making process.
- Investor Protection: Funds cannot be moved without quorum approval.

Legal Disclaimer

This report is for transparency purposes only. Always verify contract addresses and transactions on-chain. IO Beats does not assume responsibility for interactions with non-official addresses.
