

IOB Safe Multichain Transparency Report v1.0

Prepared with Dune Analytics — October 2025

Executive Summary

The IO Beats DAO Transparency Report provides a clear, verifiable overview of all treasury operations across multiple blockchains. This report consolidates fund inflows, outflows, and real-time balances from official multisig wallets on Ethereum, Base, Polygon, BNB Chain, and Arbitrum. The data is aggregated through Dune Analytics for real-time community transparency and investor confidence.

Introduction

IO Beats DAO is committed to maintaining radical transparency in all treasury operations. Each Safe wallet operates as part of a decentralized, multi-chain structure ensuring security, traceability, and collective governance. Through this system, the DAO reinforces its trust-based foundation and provides on-chain visibility to every transaction.

Dune Dashboard Overview

Official Dune Dashboard: https://dune.com/web_33_11_22/iob-safe-multichain-dashboard

Tracks real-time inflows/outflows and net balances for all IOB multisig wallets. Data auto-updated every 2–3 hours. Fully public, verifiable, and independently auditable, designed to offer instant visibility for the community and partners.

Official Safe Addresses

Chain	Safe Address
Ethereum	0xA2952C5F625e59E21012FB92A8D8269Fdb324554
Base	0xc5086e22eb99A90F345c0b6602b09b1032bb1aB6
Polygon	0xDce35f5F9aB98c6dd671b15Fb23602f67E296c0B
BNB Chain	0xF460231ACC9C5Fe80CdCC074022c43a5AF59fF06
Arbitrum	0x4B78FB95f7c2e0122356a73D8AAEB5AaF220d38C

Governance & Audit

- Structure: 4-of-7 multisig with core contributors and DAO representatives.
- Audited Contracts: <https://www.cyberscope.io/audits/iob>
- Oversight: Snapshot DAO voting & Gnosis Safe modules.
- Transparency Layer: Dune Analytics queries connected to verified on-chain indexers.
- Cross-verification via Etherscan, Basescan, Polygonscan, BscScan, and Arbiscan.

Data Sources

- Dune Analytics (real-time on-chain analytics).
- Safe API (multisig verification).
- Blockchain explorers (Etherscan, Basescan, Polygonscan, BscScan, Arbiscan).
- Cyberscope Audit (smart contract verification).

Future Outlook

IO Beats DAO will continue to expand its transparency initiatives with NFT staking yield tracking, DAO revenue analytics, and automated financial streaming via Sablier. Future integrations will include liquidity pool tracking and vault analytics for complete DeFi transparency.

Disclaimer

This report is for transparency and informational purposes only. It does not constitute financial advice. All treasury movements, inflows, and allocations are subject to DAO governance decisions and future updates.
