

## IO Bears DAO – NFT Yield Strategies v1.0 (Clean Optimized)

### Executive Summary

Genesis Collection (100 NFTs) receives 1% supply (100M IOB) as yield allocation. Each NFT receives yield across 3 years, baseline ratio 1 ETH = 10M IOB. Rarity-based distribution boosts FOMO and creates value differentiation. Yield ranges from 0.11 ETH (Common) to 0.15 ETH (Ultra Rare). DAO multisig (4/7) and audited contracts secure rewards.

### BeatsApe Genesis Yield Strategy (Rarity-Based)

Rarity	Per NFT Yield (IOB)	ETH Value	USD Value (ETH=10K)
Common	1,100,000	0.11	\$1,100
Rare	1,300,000	0.13	\$1,300
Ultra Rare	1,500,000	0.15	\$1,500

### FOMO Projections

Scenario	IOB→ETH Ratio	Genesis Yield (ETH)	Value @ 10K ETH
Base	10M = 1 ETH	0.10	\$1,000
Ambitious	5M = 1 ETH	0.20	\$2,000
Ultra	2M = 1 ETH	0.50	\$5,000
Bull Run Max	1M = 1 ETH	1.00	\$10,000

### Adjusted Floor Price Strategy

Rarity	Floor Price (ETH)	Narrative Justification
Common	0.5 ETH	Entry-level with 0.11 ETH yield base (x5 multiple).
Rare	1.0 ETH	Aligned with ambitious yield (0.2 ETH).
Ultra Rare	2.5 ETH	Reflects ultra scenario yield (0.5 ETH).
Bull Run Target	10 ETH	Matches max yield potential (1 ETH).

## Roadmap 2025–2026

Q4 2025 → Presale & Genesis Mint (target floor: 0.5 ETH). Q1 2026 → NFT Staking Portal launch (target 1,000 holders). Q2 2026 → Multi-chain Expansion (ETH, Base, Polygon). Q3 2026 → Marketplace & Strategic Partnerships.

## Legal Disclosure

All NFT yield distributions are subject to DAO approval and executed via audited smart contracts. The DAO reserves the right to amend or pause rewards based on governance votes.

Community & Partner Benefit: Up to 50% whitelist discounts may be offered via TaskOn, QuestN, and OpenSea.

**Genesis NFTs are the foundation of IO Beats: rare, yield-backed, DAO-governed, with rarity-weighted incentives.**
