## Marketplace Player Economy

Platform: [open.iobeats.com](https://open.iobeats.com)

- Revenue split: **Artists / IO Beats / Stakers**
- Dynamic yield redistribution via DAO proposals
- Part of platform fees redirected to staking & community growth pools
- Planned integration of **IO Beats Royalty NFTs** to capture long-term revenue from artist plays.

## Vesting & Security Structure

- All allocations under **multi-chain Safe 3-of-6 multisig** control.
- **Founders & team vesting** streamed via **Sablier** for transparency.
- **LP positions locked** through **UNCX / TeamFinance**.
- DAO-controlled **Community unlock** (max 5% per year).
- Additional **emergency pause mechanism** (DAO-governed) for token mint/bridge activity security.

---

## Governance & DAO

- Governance managed via [Snapshot](#).
- Token holders can vote on: treasury unlocks, staking rates, artist integrations, and ecosystem partnerships.
- DAO unlocks and spending subject to quorum voting cycles.
- DAO treasury distributed across **Safe multisigs** on Ethereum, Base, BNB, Polygon, and Arbitrum.
