

IOB Treasury Transparency Plan – Ethereum v1.0

This document outlines the treasury and fund management strategy for the IOB Token on Ethereum. The objective is to maximize transparency, ensure investor protection, and align with best practices in Web3 DAO governance.

Official Safe Address

0xA2952C5F625e59E21012FB92A8D8269Fdb324554

Safe Type	Chain	Purpose
Ethereum Treasury Safe	Ethereum	Main treasury for presale funds and allocations
Investor Streams	Ethereum	Vesting distribution for presale investors via Sablier
Liquidity Pools	Ethereum	Liquidity injection, LP locks, bribes if applicable
DAO Treasury	Ethereum	Incentives, staking, rewards, community funding

Fund Flow

Category	Percentage	Details
Liquidity Pools	40–50%	Injected into DEX LP on Ethereum, LP tokens locked
Marketing & Campaigns	20–25%	TaskOn, Zealy, Galxe, KOL partnerships
Development & DAO	15%	Protocol upgrades, DAO treasury management
CEX Listings	5–10%	Reserve for exchange listings and market making
Community Incentives	10–15%	NFT staking rewards, airdrops, quests

Sablier Vesting Integration

Investor Type	TGE Unlock	Vesting Period	Streaming Method
Presale Investors	20%	9–12 months	Sablier linear streaming
Founders & Core Team	0% (12-month cliff)	24–36 months	Sablier streams
Partners & Advisors	10%	12–18 months	Sablier streams
Marketing Reserve	Variable	12–18 months	Released in tranches via Sablier

Transparency Commitment

- All presale funds will be secured in the Ethereum Safe multisig (4/7 signers).
- Official Ethereum Safe Address: 0xA2952C5F625e59E21012FB92A8D8269Fdb324554
- All IOB token allocations (investors, LP, DAO, marketing) will be visible on-chain.
- All vesting contracts will be executed via Sablier, with links published for public verification.
- LP tokens will be locked and proof shared with the community.
- DAO governance will progressively gain control of treasury to ensure decentralization.

Disclaimer: This plan is provided for transparency and does not constitute financial advice. Allocations and vesting may evolve with DAO governance and market conditions.
