IO Beats – Treasury Safe Multichain (Audit Ready)

Version v1.0 – September 2025

Purpose

The IOB Treasury Safe is designed to secure treasury funds, manage NFT royalties, and distribute TaskOn participant rewards across multiple blockchains. It ensures transparency, automation, and governance under a strict 4/7 multisig policy.

Networks Deployed

1   1. Ethereum

2   2. Polygon

3   3. Base

4   4. BNB Chain

5   5. Arbitrum

6   6. Optimism

Authorized Signers (4/7 Required)

1   1. Founder_IOB – 0x07Bf...2555

2   2. CoFounder_IOB – 0x85aA...b1e9

3   3. TechLead_IOB – 0xd4C0...9718

4   4. CFO_IOB – 0x2A66...aff0

5   5. Governance_IOB – 0x63eD...804B

6   6. Security_IOB – 0x250c...9203d

7   7. Backup_IOB – 0x470c...5899

Governance Policy

A minimum of 4 out of 7 signers must authorize any transaction. This guarantees no single entity can access or move funds without majority approval.
